

# SNOW & BLUE GOOSE DECOYS

FINALLY AN ULTRA REALISTIC AND EFFECTIVE SNOW GOOSE DECOY

## SNOW GOOSE DECOYS

When other companies choose to go cheap by painting just any "white", we chose a different path. By combining two different whites and a more accurate "warm" white color, we created the most accurate color and finish in the Snow Goose market.

- **Adult Snows (10-Pack)**
- **Juvie Snows (10-Pack)**

## BLUE GOOSE DECOYS

Most Blue Goose schemes are a second thought to the Snow Goose. We wanted our Blue Goose to stand out on it's own! Our highly accurate paint scheme combined with the same attention to detail is what makes this decoy deadly effective!

- **Adult Blues (10-Pack)**

**Congratulations!** you are among an elite group of dedicated hunters. Your experience has led you to choose Dave Smith Decoys. We have observed that hunters who know and choose the very best equipment are also more likely to put forth more effort in the way of scouting, hunting, calling, and also have a greater respect for landowners, land, and most importantly, wildlife and hunting ethics.

Check us out at [www.davesmithdecoys.com](http://www.davesmithdecoys.com) for all the latest DSD gear including decoys, accessories, apparel, decals and more!

We greatly appreciate your business.

Good Hunting!

- The DSD Team

*The original custom decoy and still the world's most effective. Setting the standard since 1999.*

## - HUNTING & HANDLING -

### HUNTING

Under most circumstances, your Dave Smith Decoys will be more effective used alone rather than mixing them with other types of decoys, even if you only have a small number of DSD's. If you are in a situation that calls for a large spread, such as hunting un-scouted "traffic" birds in open country, we recommend that you keep your DSD's separate from the other decoys and in the spot where you want the geese to land. This system also works well to help break up the outline of lay-down blinds if hunting in the middle of a low cut field.

### HANDLING

Although the paint quality and adhesion is the best in the industry, we still recommend that you protect your investment by transporting your DSD's in protective bags. Not only does bagging prevent scrapes or scratches, but it also helps keep the decoys clean and therefore, more effective. We recommend the use of the 3MM Plastic Bags that the decoys come in. For large spreads, a very popular method of transporting decoys is to place the bagged decoys into large seed bags. Our decoys also come standard with tail loops to make it easy to grab a large amount of decoys at once for quick setup and spread adjustments.
